

## STREET NETWORK

- 15th Avenue is a major artery and freight route between Magnolia and Queen Anne. Its capacity is limited by the Ballard Bridge to the north and congestion to the south.
- Interbay has a very limited road network, but can now be accessed via the Galer fly-over as well as the Magnolia bridge. Access via 21st Street to the north has been closed by mutual agreement between the Port and the community. That access is expected to be opened in the future.
